Intervention Areas

Agricultural projects focused on Productive Innovation Investment are eligible for support, aiming at the structural reinforcement and modernisation of companies, increasing the resilience of agricultural holdings, diversifying production, or adopting emerging technologies.

Eligible support covers individual productive investment operations of an innovative nature within the agricultural sector, related to the following types of operations:

- a. Increasing the physical resilience of facilities, plantations, equipment and infrastructures, as well as the protection of communication and energy systems;
- b. Diversification of production through the introduction of goods not previously produced on the farm;
- c. Adoption of emerging technologies.

Geographic Area

Mainland Portugal

Funding Conditions

Up to 50% Non-Refundable Grant

In addition to the funding provided under this instrument, a 100% repayable financing component may also be granted to cover non-eligible expenses and working capital needs, calculated based on the total project investment.

Investment Amount

Minimum Investment:

€400,000

Maximum Investment:

€1.2 Million

Eligible Beneficiaries

Entities that, regardless of their legal form, carry out an economic activity related to primary agricultural production and qualify as SMEs are eligible.

This includes, in particular, entities engaged in artisanal or other individual or family-based activities, partnerships, or associations that regularly carry out economic activities, provided they qualify as SMEs.

Eligible Expenses

- a)** Construction or improvement costs of immovable assets, including investments in internal passive cabling or structured data network cabling and, where necessary, the ancillary part of the passive network located outside the building on private property;
- b)** Expenses related to the purchase or lease-purchase of machinery and equipment up to the market value of the asset;

c) General costs associated with the above-mentioned expenses, such as fees for architects, engineers and consultants, advisory services related to environmental and economic sustainability, sustainable energy, energy efficiency, and renewable energy production and use, including feasibility studies. Feasibility studies may remain eligible even if no investment is ultimately carried out based on their conclusions;

d) Costs related to the acquisition, development or use of software, cloud computing solutions and similar technologies, as well as patents, licenses, copyrights and trademarks;

e) Expenses related to non-productive investments associated with environmental and climate objectives;

f) Irrigation costs;

**PRR Agriculture
Modernisation Programme**

g) In the case of investments aimed at restoring agricultural production potential affected by natural disasters, adverse climatic events comparable to natural disasters, animal diseases, plant pests or protected animals, eligible costs may include expenses incurred to restore agricultural production potential to the level existing before the occurrence of those events;

h) In the case of investments aimed at preventing damage caused by natural disasters, adverse climatic events comparable to natural disasters, animal diseases, plant pests or protected animals, eligible costs may include expenses related to specific preventive actions.
